Do not dry in the sun.

For appropriate hygiene, it is advisable to  
vacuum the upholstery regularly, using a  
soft brush.

## CLEANS JUST WITH WATER

With the new revolutionary Aqua-Clean treatment by AMARA, you will be able to easily clean stains such as milk, cold drinks, oil, wine, coffee, liqueurs, ketchup..., it even cleans ballpoint and marker pen stains just with water.

Owing to its properties, it can remove even the most stubborn stains easily and conveniently. We recommend you follow these steps:

Remove any excess of the product spilt on the upholstery.

Apply water to the stain, either directly or using a damp paper tissue or an absorbent cloth. Do not make the fabric too wet. Wait a few seconds.

Press on the stain with the cloth or paper tissue, and then rub the fabric gently with circular movements.  
If the stain does not disappear completely, repeat the process as often as necessary.
